

Homophobia is a term invented by those who practice and promote the unchaste behavior of homogenital sex. Dictionaries call phobia is an extreme fear. Psychology treats it as a mental problem. Homophobia exists only in the minds of practicing or promoting homosexualists to attack and silence those who rightly reject homogenital sex. My fellow Catholics you are not a cancer because rejection of homosexuality is biblical, Christian, and Catholic. Tolerance of people with homosexual desire and practice is Christian when accompanied by prayer and urges for Robert McElroy, James Martin, and others to live chastely while God helps them to accept their sexual identity as male or female ordered toward the opposite sex, CCC 2333.

Islamophobia is a term invented by those who wish to blind us to the tenets of Islam, its prophet Mohammed and what he calls revelation from his god, Allah. Dictionaries call phobia an extreme fear. Psychology treats it as a mental problem. Islamophobia exists only in the minds of those who wish to promote Allah, Islam, the Koran, Mohammed and who wish to try to establish relationships of tolerance with its adherents, all of which has shown to be impossible since Islam's inception because of the commands of its god to its prophet codified in its book, and lived out in the demand that all must convert to Allah, to acknowledge Mohammed as his prophet, the Koran as the sacred book, and to submit to it.
